PANTONE®

COLOR BRIDGE GUIDE COATED

TRANSLATE PANTONE COLORS INTO CMYK, HTML, AND RGB

GG6103B

Side-by-side comparisons of all Pantone Spot Colors with their closest industry-standard CMYK color matches.

Formulated to match G-7 calibrated CRPC6 and CRPC3 press references to accurately manage and visualize color conversion, color expectations, and color matching.

Versatility — Translate Spot Colors to CMYK, RGB, and HTML.

Eco-Friendliness — New eco-friendly ink formulation allows for coating Pantone Colors during print production to protect prints and packaging applications.

Portability — Compact, handheld fan deck including the 224 newest colors, printed on both coated and uncoated paper.

Connectivity — Integration with Pantone Connect for Adobe Creative Cloud which allows you to take your physical Pantone Colors into your digital workflow.

With the Pantone Color Bridge Guide Coated, everyone around the world can create color consistently.

Inspiration

Create designs for digital, animation, and packaging when CMYK process printing is required.

Creation

Easy on-the-go reference provides a visual representation for Pantone Spot Colors translated to CMYK.

Production

CMYK translation enable process color matching of Pantone Spot Colors.
