

COLOR BRIDGE GUIDE UNCOATED

TRANSLATE PANTONE COLORS INTO CMYK, HTML, AND RGB

GG6104B

Use the Pantone Color Bridge Guide Uncoated to see the most accurate results of converting a Pantone Spot Color to its process color equivalent.

Formulated to match G-7 calibrated CRPC6 and CRPC3 press references so you can confidently manage and visualize color expectations, color conversion, and color matching.

Versatility — Translate Spot Colors to CMYK, RGB, and HTML.

Eco-Friendliness — New eco-friendly ink formulation allows for coating Pantone Colors during print production to protect prints and packaging applications.

Portability — Compact, handheld fan deck including the 224 newest colors, printed on both coated and uncoated paper.

Connectivity — Integration with Pantone Connect for Adobe Creative Cloud which allows you to take your physical Pantone Colors into your digital workflow.

With the **Pantone Color Bridge Guide Coated**, everyone around the world can create color consistently. Contact your Pantone Account Manager or email sales@pantone.com to learn more.
